EDUCATION

Universidad Politecnica
de Valencia
Bachelor's Degree in
Telecommunications Systems
2000-2004
The PowerMBA

WORK EXPERIENCE

SIX Group AG, Senior Cloud Data Engineer

FEBRUARY 2022 - PRESENT

- Designed and delivered a secure, scalable Azure data platform using Databricks as the core processing layer and Terraform as the primary IaC tool, implementing private networking, RBAC, and cloud best practices.
- Act as an SME for Databricks and Spark, supporting onboarding of new use cases, reviewing pipelines, advising on architecture, and driving performance and reliability improvements.
- Developed common Databricks-ready templates, tooling, and automation to standardize data pipelines and accelerate adoption across teams.
- Built a FinOps data solution on Databricks, providing cost transparency and optimization insights for all cloud workloads in the platform.

Kabel Sistemas de Información, Senior Cloud Data Engineer

MAY 2018 - FEBRUARY 2022

- Contributed to pre-sales engagements by providing technical assessments and solution designs for customers adopting or migrating to Azure and Databricks architectures.
- Served as a core team member of the Repsol Data Platform (ARiA) from 2018 to 2021, contributing to the build and operation of a large-scale Azure and Databricks-based enterprise data platform.
- Designed and implemented cloud architectures for data-centric solutions, acting as a Cloud Engineer with strong focus on scalability, security, and Azure best practices.
- Recognized as a Databricks Solution Architect Champion for technical excellence and leadership in Databricks-based solution design.

Jesus Arnau

SENIOR CLOUD DATA ENGINEER

AZURE | DATABRICKS | SPARK |
TERRAFORM

WORK EXPERIENCE

Babel Sistemas, Software Architect

OCTOBER 2017 - MAY 2018

- Migrated legacy systems to modern on-prem and cloud architectures, improving performance and reliability.
- Promoted best practices in application development across teams and projects.
- Translated business needs into actionable product backlogs and technical requirements.

Kabel Sistemas de Informacion, Software Architect

APRIL 2011 - OCTOBER 2017

- Designed and developed custom architectures and full-stack JavaScript applications (browser and server-side).
- Ensured development aligned with industry best practices and coding standards.
- Collected business requirements and translated them into clear, prioritized product backlogs.

Dacartec Servicios Informáticos, Full Stack Engineer

MAY 2010 - APRIL 2011

- Developed custom software architectures and tailored application solutions.
- Designed and executed test plans to ensure high-quality, reliable software delivery.

Jesus Arnau

SENIOR CLOUD DATA ENGINEER

AZURE | DATABRICKS | SPARK |
TERRAFORM

WORK EXPERIENCE

Tooio Mobile, Full Stack Engineer

FEBRUARY 2008 - MAY 2010

- Designed and developed web applications and API services to support mobile platform integration.
- Built geo-based messaging services as part of an early-stage startup

Delanada, CTO & Co-Founder

JANUARY 2007 - FEBRUARY 2008

- CEO & Co-founder of a startup delivering custom web applications and API services for small and medium businesses.
- Led end-to-end product design, development, and client delivery to meet diverse business needs.

ODEC, Full Stack Engineer

NOVEMBER 2004 - JANUARY 2007

- Contributed to the development and testing of the core electoral platform for the 2005 Xunta de Galicia elections.
- Part of the official team responsible for the electoral scrutiny project during the election process.

COURSES & CERTIFICATIONS

Databricks: Solutions Architect Champion

SEPTEMBER 2021 - PRESENT

Databricks Certified Developer for Apache Spark 3.0

SEPTEMBER 2021 - PRESENT

Microsoft AZ-400: Designing and Implementing Microsoft DevOps Solutions

JULY 2021 - PRESENT

Microsoft DP-200: Implementing an Azure Data Solution

JANUARY 2020 - PRESENT

Deep Learning Specialization - By Andrew Ng (Deeplearning.ai)

MAY 2018 - PRESENT

Microsoft Specialist - Azure Solutions

DECEMBER 2015 - PRESENT

Jesus Arnau

SENIOR CLOUD DATA ENGINEER
AZURE | TERRAFORM | DATABRICKS |
SPARK

TECHNICAL SKILLS

- Big Data: Spark, Databricks, SQL, Python, Scala
- DevOps: Ansible, Terraform, Azure DevOps
- Back-End Development: C#, Python, Node.js
- Cloud Skills: Azure, Docker, Kubernetes
- Scripting: PowerShell, Bash
- Machine Learning & Data Science: Scikit-Learn, Pandas, Numpy
- Deep Learning: Keras, Tensorflow
- Front-End Development: Javascript, React, Angular, HTML, CSS3

SOFT SKILLS

- Strong communication skills, both interpersonal and public-facing
- Confident decision-maker with experience in conflict resolution
- Collaborative team player with the ability to work independently when needed
- Demonstrates empathy, active listening, and respect in all interactions
- Creative problem-solver committed to continuous learning and improvement
